CV - Backend Developer

Full Name: Trần Bách Tòng

Email: bachtong01@gmail.com | Phone: 0899510892

GitHub: https://github.com/sa160148 | https://github.com/tong-normal-guy

Portfolio: **portfolio2-beta-three.vercel.app**

Career Objective

Final-year Software Engineering student keen to explore backend development. Have built APIs, designed databases, and dealt with system performance in coursework and projects. Looking forward to opportunities to learn more, contribute, and refine my skills through hands-on work.

Technical Skills

- Programming Languages: C#, SQL

- Frameworks: ASP.NET Core

- Databases: SQL Server, PostgreSQL, MySQL, Firestore (basic)

- Tools: Git, Docker, Postman, Visual Studio, IntelliJ

Project Experience

Koi Pound Construction Order System

Time: 2025

GitHub: https://github.com/sa160148/sep490-kpcos-temp.git

Tech Stack: ASP.NET Core Web API, PostgreSQL, Firestore

- Developed a construction order management system for koi ponds.
- Designed APIs for order management, construction progress, and reporting.
- Utilized PostgreSQL for core data and Firestore for supplementary information.
- Implemented RESTful principles and handled authorization using JWT.

Bird Reproduction Management System

Time: 2023

GitHub: https://github.com/tong-normal-guy/bird-swp.git

Tech Stack: Java Spring Boot, MySQL

- Developed a system to track bird reproduction in an artificial environment.
- Managed breed information, reproductive cycles, pairing history, and offspring tracking.
- Designed and implemented backend APIs using Spring Boot.

Education

FPT University HCM Campus
Bachelor of Software Engineering
Expected Graduation: 2025
